Always a clear view

The goggles for safety and anti-fog vision – for working with chemicals, CMR drugs

The fully enclosed safety goggles made by UVEX Safety were manufactured to the specifications by Berner International. They guarantee optimal protection against mechanical risks, liquids and large dust particles. The flexible, soft body and adjustable headband offer exceptional comfort, even when worn over prescription glasses. This is made possible due to the special shape and superior quality materials. As especially safety goggles must not leave pressure marks when worn with spectacles. An elaborate ventilation system and the special anti-fog coating ensure clear vision at all times.

Material:

- » Large goggles
- » Side protection
- » Increased mechanical rigidity (S)
- » Optical quality class 1
- » Universal fit
- » Colour: transparent
